

Dear Valued Customer,

Regarding inland haulage for inland corridors from Swaziland and Botswana locations, we have implemented an inland surcharge for container weighing (which we can offer upon request), effective 1 May 2020. The amount per container will be ZAR 1000.

For container weighing in South Africa, until now we have been using the VGM surcharge code. As the VGM surcharge code gets used by other areas for misdeclaration of VGM instead, we will going forward use the container weighing inland surcharge code when export customers' requests us to do container weighing (method 1), which we can offer upon request. Effective 1 MAY 2020, the amount per container will be ZAR 1000.

Best Regards,  
Safmarine
